RESEARCH PROFILE

I develop deep learning methods for ultrasound image analysis that treat ambiguity – at lesion boundaries and across datasets – as a signal rather than noise, so that models stay reliable on the small, heterogeneous datasets typical of point-of-care imaging. My doctoral work introduced a fuzzy rough set loss (*Computerized Medical Imaging and Graphics*, 2026) and an adaptive ensemble loss (*Medical & Biological Engineering & Computing*, 2025) for segmentation, and efficient, interpretable classifiers for breast ultrasound (*Neural Processing Letters*, 2023; *Image and Vision Computing*, 2024; *Biomedical Signal Processing and Control*, 2026).

At UPES I extended this work to breast, thyroid and fetal ultrasound as first and corresponding author of MSCT-Trans (*Ultrasound in Medicine & Biology*, 2026), written without my doctoral advisor. My current agenda extends uncertainty-aware learning to maternal–fetal Doppler ultrasound, the subject of an ICMR ANVESHAN proposal I submitted as Principal Investigator (under review).

Record: 9 publications since 2022 (7 as first author; 4 in SJR Q1 journals); 115 citations and h-index 4 (Google Scholar, September 2026); code released publicly for 6 papers; reviewer for 8 journals, including IEEE TMI and IEEE JBHI.

EDUCATION

Nov 2020 – Jul 2026	Ph.D. in Computer Science DEGREE AWARDED 28 JULY 2026 University of Hyderabad, India <i>Thesis: Advances in Deep Learning for Medical Image Segmentation and Classification</i> • Advisor: Dr. Avatharam Ganivada, School of Computer and Information Sciences • Funded by the UGC Junior Research Fellowship (All India Rank 53)
Sep 2017 – Mar 2019	M.Phil. in Computer Science Mewar University, India <i>Thesis: Performance Comparison of Face Detection and Recognition Algorithms</i>
Mar 2013 – Jun 2016	Master of Computer Applications (MCA) University of Kashmir, India <i>Project: SMS Intimation System for Online Leave Management</i>
Mar 2010 – Jan 2013	B.Sc. (Mathematics, Physics, Information Technology) University of Kashmir, India

ACADEMIC APPOINTMENTS

Jul 2025 – Present	Assistant Professor School of Computer Science, UPES, Dehradun, India • Moved to the Research Faculty track in January 2026 • First and corresponding author of MSCT-Trans (<i>Ultrasound in Medicine & Biology</i>, 2026), written at UPES without my doctoral advisor • Principal Investigator on an ICMR ANVESHAN proposal (₹25 lakh, 24 months) on AI-assisted umbilical artery Doppler ultrasound – submitted 2026, under review • Teach B.Tech. and M.Tech. Computer Science courses; supervise B.Tech. and M.Tech. projects in machine learning and computer vision
Jan 2022 – Dec 2024	Teaching Assistant School of Computer and Information Sciences, University of Hyderabad, India • Delivered tutorial and laboratory sessions for graduate courses in deep learning and computer vision • Designed and evaluated programming assignments; mentored IMTech and M.Tech. students on course projects

Jan 2021 – Dec 2022

System Administrator, Artificial Intelligence Lab

School of Computer and Information Sciences, University of Hyderabad, India

- Managed GPU workstations and server infrastructure supporting the AI research group
- Configured and optimised deep learning software environments for lab-wide research use

2019

Assistant Professor

Government Degree College Uri, Baramulla, J&K, India

- Taught undergraduate Computer Science courses; developed material for programming and data structures

GRANTS AND FUNDING

ICMR ANVESHAN Small Extramural Grant – Principal Investigator SUBMITTED 2026 • UNDER REVIEW

AI-Assisted Automated Quantification of Umbilical Artery Doppler Ultrasound for Early Detection of Fetal Compromise. Requested budget **₹25,00,000** over 24 months. Call No. ICMR/IDC/EPMS/CallforProposal/2026.

- Co-PI: Dr. Ufaque Muzaffar (Medical Officer, Department of Health & Family Welfare, J&K); Co-Investigator: Prof. Tanupriya Choudhury (UPES)
- Priority area: Reproductive, Maternal & Child Health – Antenatal Care

Institution of Eminence (IoE) International Travel Grant – University of Hyderabad 2024

INR 1,00,000 covering registration, international travel and per diem (Sanction Order No. UoH-IOE/Travel/24/375, 24 July 2024), to present *Dynamic Weight-Adjusted Ensemble Loss for Enhanced Medical Image Segmentation* at ICCCN-2024, Manchester, United Kingdom, 17–18 October 2024.

In preparation: ANRF (Anusandhan National Research Foundation) research grant proposal on uncertainty-aware deep learning for medical imaging – submission planned 2026–27.

RESEARCH INTERESTS AND SCHOLARLY SERVICE

RESEARCH INTERESTS

- Ambiguity- and uncertainty-aware deep learning for ultrasound image analysis
- Loss function design: fuzzy rough set and adaptive ensemble objectives
- Interpretable models: saliency-guided attention and multi-scale token transformers
- Medical image segmentation and classification; cross-dataset generalisation
- Soft computing: fuzzy-rough learning and evolutionary feature selection

PEER REVIEW – JOURNALS

- IEEE Transactions on Medical Imaging
- IEEE Journal of Biomedical and Health Informatics
- Information Fusion (Elsevier)
- Image and Vision Computing (Elsevier)
- Engineering Applications of Artificial Intelligence (Elsevier)
- Neural Computing and Applications (Springer)
- Multimedia Tools and Applications (Springer)
- Journal of Clinical Ultrasound (Wiley)

OPEN SCIENCE

- Code for six publications released publicly at github.com/MohsinFurkh (EfficientU-Net, GA ensemble, UMA-Net, fuzzy rough set loss, Saliency-Guided AttentionNet, MSCT-Trans)

HONOURS

2019 **UGC NET with Junior Research Fellowship (JRF)**, Computer Science & Applications – **All India Rank 53**

PRESENTATIONS AND PROFESSIONAL DEVELOPMENT

Oct 2024 **Conference Presenter – ICCCN-2024, Manchester, United Kingdom**
"Dynamic Weight-Adjusted Ensemble Loss for Enhanced Medical Image Segmentation" – supported by the IoE International Travel Grant

2026 One-week Train-the-Trainer (T3) programme, *Cloud Application Development*, **IBM**

2025 One-week Train-the-Trainer (T3) programme, *Pattern Recognition*, **IBM**

2024 Workshop participant, *MRI and EEG Data Analysis*, IIT Hyderabad

TEACHING

COURSES TAUGHT

- **UPES Dehradun:** DevOps (B.Tech. Year 4, 2026); Research Methodology in Computer Science (B.Tech. Year 3, 2026); Python Programming (B.Tech. Year 1, 2026); Database Systems (M.Tech. Year 1, 2025); C Programming (B.Tech. Year 1, 2025)
- **Government Degree College Uri:** Data Structures and Algorithms; Discrete Mathematics (B.Sc. Computer Science, Year 2)

COURSES ASSISTED (TEACHING ASSISTANT, UNIVERSITY OF HYDERABAD)

- Deep Learning for Computer Vision
- Advanced Machine Learning
- Neural Networks and Applications
- Research Methodology

SUPERVISION AND MENTORING

- UPES: supervise B.Tech. and M.Tech. projects in machine learning and computer vision
- University of Hyderabad: mentored IMTech and M.Tech. students on course projects; guided two research assistants on fuzzy rough kernel-based extreme learning machines and mineral prospectivity classification
- Approach: project-based instruction that pairs mathematical foundations with reproducible implementation

TECHNICAL SKILLS

Programming	Python, C, MATLAB, SQL
Deep Learning	TensorFlow, Keras, PyTorch (working knowledge), CUDA / GPU training workflows
Machine Learning	Scikit-learn, NumPy, Pandas, SciPy, OpenCV, Matplotlib, Seaborn
Tools	Git, Docker, Jupyter, PyCharm, LaTeX, Linux / HPC, Mendeley, Zotero
Databases	MySQL
Domain	Medical image segmentation and classification, explainable AI, fuzzy and rough set methods, evolutionary optimisation
